**Hi-bor® Brand Borate  
Pressure Treated Wood  
Product Information Guide**

Hi-bor® Brand Borate Pressure Treated Wood Products are:

- Manufactured by licensed, independently owned and operated treating plants that produce products to stringent Hi-bor standards.
- Pressure treated with an EPA registered borate wood preservative for protection against termites, carpenter ants, and fungal decay.
- For use in above ground weather protected structural framing in residential and commercial projects, such as residential dwellings, industrial buildings, mobile or modular home construction, or any application requiring wood protected against termites, carpenter ants, and fungal decay, including dry rot.

**Product Description****Basic Uses**

- Hi-bor Brand Borate Pressure Treated Lumber is recommended for joists, studs, roof trusses, blocking, rafters, beams, and other framing applications.
- Hi-bor Brand Borate Pressure Treated Lumber is also recommended for fascia, trim, and miscellaneous wood applications, when properly protected from the weather (refer to limitations).
- Hi-bor Brand Borate Pressure Treated Plywood is recommended for wall sheathing, roof sheathing, and subfloors, where not exposed to wetting conditions.

**Materials**

- Hi-bor Brand Borate Pressure Treated Wood is treated with Disodium Octaborate Tetrahydrate (DOT). This preservative is registered with the EPA and meets the requirements of American- Wood Preservers' Association Standard P5.
- All products shall be pressure treated in conformance with the Hi-bor Treating Manual.
- Approved lumber species are Southern Yellow Pine, Douglas Fir, Hem-Fir, and Spruce-Pine-Fir.
- Approved plywood species are Southern Yellow Pine and Douglas Fir.
