

Pioneered Wood News

Are you tired of hearing about oil prices shooting through the roof, a probable burst in the real estate bubble and building material cost increases? We are too! Without ignoring the impact of current events, it is our hope to provide stability to our customer base in a small but significant way. Harvest Timber Co. and Pioneered Wood brand flooring prices remain unchanged since October of 2004!

Consider a few more reasons why to purchase Pioneered Wood flooring over other leading brands:

“We are small enough to provide immediate and effective customer service.”

“We take every possible opportunity in our production process to assemble the highest quality product achievable.” This includes:

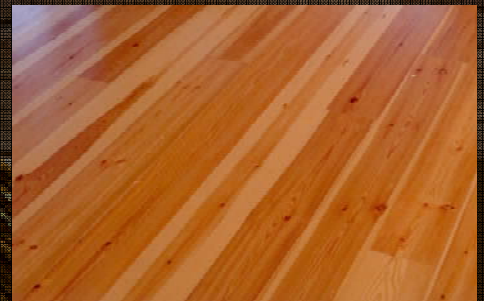

Fiber resources second to none

2 kiln drying processes

Precision milling and end-matching

7-coat, UV cured, Aluminum Oxide finish.

Be WATCHING for a NEW product selection to be introduced before NOVEMBER 31st...
